I can collect analyse statistics and other information in order to draw clear conclusions about locations.

**Task A:** Using the internet, find out the relevant statistics about Egypt to complete the table.

Google   what is the population of Egypt?   Q

Q All   Images   News   Maps   Videos   More   Settings   Tools

Figure 1 An example of how to search

Statistics	Egypt	UK
Population (How many people live in the country?)		66.44 million
Life Expectancy (How many years do people who live there live for?).		80.96 years
Land Size (How big is the country?)		242,495 km²
Size of Capital (How big is the capital city?)		1,572 km²
Density (How much land is used?)		274 people per square kilometre
Temperature (What is the average temperature?)		18 to 25 °C
Gross national income (How much money does the country make each year?)		2.85 trillion dollars
Birth Rate (How many children does each mother have on average?)		1.80 births per woman

Task B: Using the information you have just collected, answer the following questions

1. Which country has a bigger population?
2. Which country is bigger?
3. Which country has a larger national income?
4. Which country is warmer?
5. Which country has a larger birth rate?

Beat the Challenge

What other conclusions can you make?
