⭐⭐⭐

I can collect analyse statistics and other information in order to draw clear conclusions about locations.

Task A: Using the internet, find out the relevant statistics about Egypt, Greece and **another country** to complete the table.
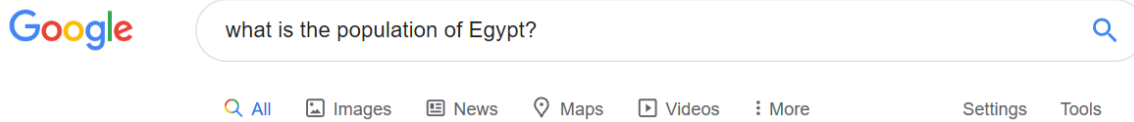

Google   what is the population of Egypt?   🔍

🔍 All   🖼 Images   📰 News   ⚲ Maps   ▶ Videos   ⋮ More   Settings   Tools

Figure 1 An example of how to search

Statistics	Egypt	Greece	_____
Population (How many people live in the country?)			
Life Expectancy (How many years do people who live there live for?).			
Land Size (How big is the country?)			
Size of Capital (How big is the capital city?)			
Density (How much land is used?)			
Temperature (What is the average temperature?)			
Gross national income (How much money does the country make each year?)			
Birth Rate (How many children does each mother have on average?)			

Task B: Using the information you have just collected, answer the following questions

1. Which country has the biggest population?
2. Which country is the biggest?
3. Which country has the largest national income?
4. Which country is the warmest?
5. Which country has the largest birth rate?

Beat the Challenge

What other conclusions can you make?
